Work Check

Code	Color
Warning - Documenting problem as initial warning	
Action - team discussion for further action taken to fix problem	

Reviewee	Reviewer	Work in standup	Actual work done
Jason	Julie, Khuong	Fix the backend code design of Usage Analysis Dashboard based on the discussion with Vong. Started reintegrating ArtistProfileCalendar Backend Reintegrate ArtistProfileCalendar Controller Reintegrate ArtistProfileCalendar Frontend Implemented Test Cases for reintegrated ArtistProfileCalendar Implemented Logging for ArtistProfileCalendar.	Has fixed his feature like i had asked, while doing usage analysis dashboard. Has done everything stated and has been really good at keeping pace. Jason is still working on the User Analysis Dashboard as well.
Diego	Julie, Khuong	Finished frontend/backend bingo board code to connect	Had everything ready by the 20th and has been good with

		Finished pagination, interest buttons, front-end and backend code Fixed bingo board not hiding on other features calls	deadlines. The work looks good and works well lucky we had it for our team review. He fixed the error coming from Git merge in index.html
Kihambo	Julie, Khuong	● Make the collab feature frontend so that it displays all of the usernames that have been sent a collab request when the user clicks on "See Collabs"	Did not meet the deadline after 2 extensions one on the 20th the second being the 22nd. He already has 1 warning and we extended so this is the official action documentation for missing the 22nd. He was notified the 22nd and the Team will review Friday and provide the professor a decision the 29th
Parth	Khuong, Julie	(WIP) Fixing LLD Design based on professor feedback for my feature price range sorting. (Done)PriceRangeSortingDAO code (Done)PriceRangeSortingService code (Done)PriceRangeSortingController code (Done)PriceRangeSorting Frontend code. Created HTML, CSS, and JS for my specific feature.	Parth got his feature to implement the fixes that Frank advised to increase his feature complexity and usability. Has everything he stated in his standup. Created frontend test cases for his feature using Cypress too.
Julie	Jason, Khuong	Fixed middleware to keep login and registration outside AuthN and AuthZ Restructured directory to only have 1 solution Working on Dar report for my feature technology	Has everything stated as being done/finished in standup. Only thing to note is that the DAR Report is still in progress.

		Peer review for Diego Got Main updated to have Bingo Board feature Fixed configuration for artist portfolio service Removing errors from code Got Diego's testcases into codebase in artist portfolio branch	
An	Julie, Khuong	Fixing LLD Item Creation to upload file to S3 bucket. Create, config aws S3 bucket. Created S3ObjectModel, UploadS3Controller API endpoint to list files, upload, delete, and get presignedURL from S3 bucket. Created ItemCreationModel, ItemCreationService, Item Creation DAO, and ItemCreationController to create new craft items.	Looks good has implemented s3 bucket already to save and access files, finishing up feature and getting more work from khuongs implementation for higger complexity. Has end to end testing later on.
Khuong	Julie	● Drew The LLD for the InventoryStock feature(waiting for Professor Vong's Feedback). ● Fixed Splitting Validating Access Token and Signature Check into different functions in Custom AuthZ based on Professor feedback ● Fixed checking preflights before	Looks good added middleware into tasks earlier in sprint and has been still able to get feature work done. Had some portion ready for tea review.

		- checking headers in Custom Cors Middleware. - Design LLD for Financial Progress Report. - Finish the rough draft of the Backend: InventoryStockModel, InventoryStockController, InventoryStockService, and InventoryStockDAO. (WIP) Create the functions in FPRDAO to retrieve Profits, Revenue, and Data (Yearly, Quarterly, Monthly). - I created the basic format for FPR API and FPR Service.
